

I received an email about this proceeding and I am completely against the changes to the Indiana Telephone Privacy Act. I have received only one telephone call from a telemarketer and that was back in May. I DO NOT want my phone to begin ringing off the hook again with all these solicitation calls. Please consider all the people in Indiana this is helping and don't do this. I can sit and enjoy my dinner without interruption and I can study and research my college grad class work without interruption. As a consumer I don't want that right infringed upon by some weaker national standard.
